# M 4.9, 2 km E of Kailua-Kona, Hawaii

Origin Time: 2022-05-22 09:49:44 UTC (Sat 23:49:44 local) Location: 19.6296° N 155.9637° W Depth: 20.2 km

**Estimated Fatalities** 69% 100 10,000 1,000

and economic losses. There is a low likelihood of casualties and damage.

Created: 2 hours, 4 minutes after earthquake Green alert for shaking-related fatalities Estimated Economic Losses 65% 30%

**Estimated Population Exposed to Earthquake Shaking** 

ESTIMATED POPULATION EXPOSURE (k=x1000)		39k*	510k	21k	35k	0	0	0	0	0
ESTIMATED MODIFIED MERCALLI INTENSITY		I	II-III	IV	V	VI	VII	VIII	IX	X+
PERCEIVE	SHAKING	Not felt	Weak	Light	Moderate	Strong	Very Strong	Severe	Violent	Extreme
POTENTIAL DAMAGE	Resistant Structures	None	None	None	V. Light	Light	Moderate	Mod./Heavy	Heavy	V. Heavy
	Vulnerable Structures	None	None	None	Light	Moderate	Mod./Heavy	Heavy	V. Heavy	V. Heavy

<sup>\*</sup>Estimated exposure only includes population within the map area.

## Population Exposure

population per 1 sq. km from Landscan 5000

### bold cities appear on map.

### **Structures** Overall, the population in this region resides in structures that are resistant to earthquake shaking, though vulnerable structures exist. The predominant vulnerable building types are unreinforced brick ma-

# **Historical Earthquakes**

Date	Dist.	Mag.	Max	Shaking
(UTC)	(km)		MMI(#)	Deaths
1973-04-26	96	6.2	VII(74k)	0
2006-10-15	25	6.7	VIII(15k)	0
1975-11-29	99	7.2	IX(30k)	2

Recent earthquakes in this area have caused secondary hazards such as landslides that might have contributed to losses.

PAGER content is automatically generated, and only considers losses due to structural damage. Limitations of input data, shaking estimates, and loss models may add uncertainty.
